TECHNOLOGIES

- Technology Partnerships

- Technologies

MUSALA SOFT AND IoT

- Focusing in IoT since 2012
- Working in Home automation area since 2013
- Working with iBeacons data since 2014
- Working in the area of wearables since 2015
- Dedicated IoT teams – Home Automation, Wearables, iBeacons, Opensource projects

QIVICON SMART HOME PLATFORM

- Client – Group Innovation @ Deutsche Telekom AG
- Working with Qivicon since 2013
- Currently 35+ experts in 7 teams
- Teams involved in development of most of the modules - backend, home base runtime, bindings and front-end
- Responsible for the entire testing of the platform
- Working in a self-sustainable aligned operational model for years

MUSALA SOFT AND OPENHAB

- Member of the OpenHAB Foundation since end of 2016
- Initial contribution of a tool for openHAB and ESH specific static analysis of the new PRs to enhance the PR review process
- Migrated all the HTTP connections in ESH to use Jetty and dropped the other HTTP clients
- Prepared the Newcomer Developer's guide in docs.openhab.org for OSGi, Tycho, Equinox, Target Platform
- Energenie Mi|Home Devices Binding - entirely new binding, implemented from scratch
- Initial experiments with Bluetooth Low energy (BLE). First tries to implement a device binding, based on the current BLE integration in openHAB

MUSALA SOFT AND OPENHAB

- Media publication for openHAB 2.0
- Implemented unit and in-container tests for some ESH services (ConfigDispatcher, FolderObserver, AbstractWatchService)
- Implemented unit and in-container tests for some openHAB addons – NTP, Wemo, FSInternetRadio, Audio, Astro
- The dedicated Open Source Team contributed:
 - 40 merged PRs for the Static Analysis Tool
 - 11 merged PRs in openhab docs
 - 25 merged PRs in openhab2-addons
 - over 25 merged PRs in ESH
