# HOW DEUTSCHE TELEKOM DELIVERS A MASS MARKET PRODUCT BASED ON ECLIPSE SMARTHOME

SMART  
OCTOBER 22, 2017  
H  ME  
LUDWIGSBURG, GERMANY  
D A Y

Jochen Hiller, Deutsche Telekom AG  
Product Owner, Developer Evangelist

**WHERE WE STARTED . . .**

# PLATFORM LAUNCH IN OCTOBER 2013

- ▶ Home Gateway
- ▶ Based on commercial Java/OSGi products
- ▶ CVM (Java 1.4), OSGi R4.2
- ▶ *Launch JavaSE Embedded 7 !*
- ▶ HomeMatic (builtin)
- ▶ ZigBee HA 1.2 (stick)

# PARTNER PRODUCTS LAUNCHED IN OCTOBER 2013

powered by 

# WHAT WE LEARNED...

- ▶ APIs provided are too complex
- ▶ Developing "drivers" for SmartHome devices is painful
- ▶ Developing for embedded gateways needs special considerations (performance, footprint)
- ▶ Update process is complex, needs careful OSGi bundle implementations

# INTRODUCING ECLIPSE SMARTHOME - A TIMELINE

2013-08-21

ESH proposal (based on openHAB 1)

2013-11-15

ESH project setup

2014-Q1

Decision to integrate ESH in QIVICON

2014-06-23

Contribution of  
Things/Channels

Commits on Jun 23, 2014

Initial contribution of thing concept. ...

dnobel committed on 23 Jun 2014

2015-Q1

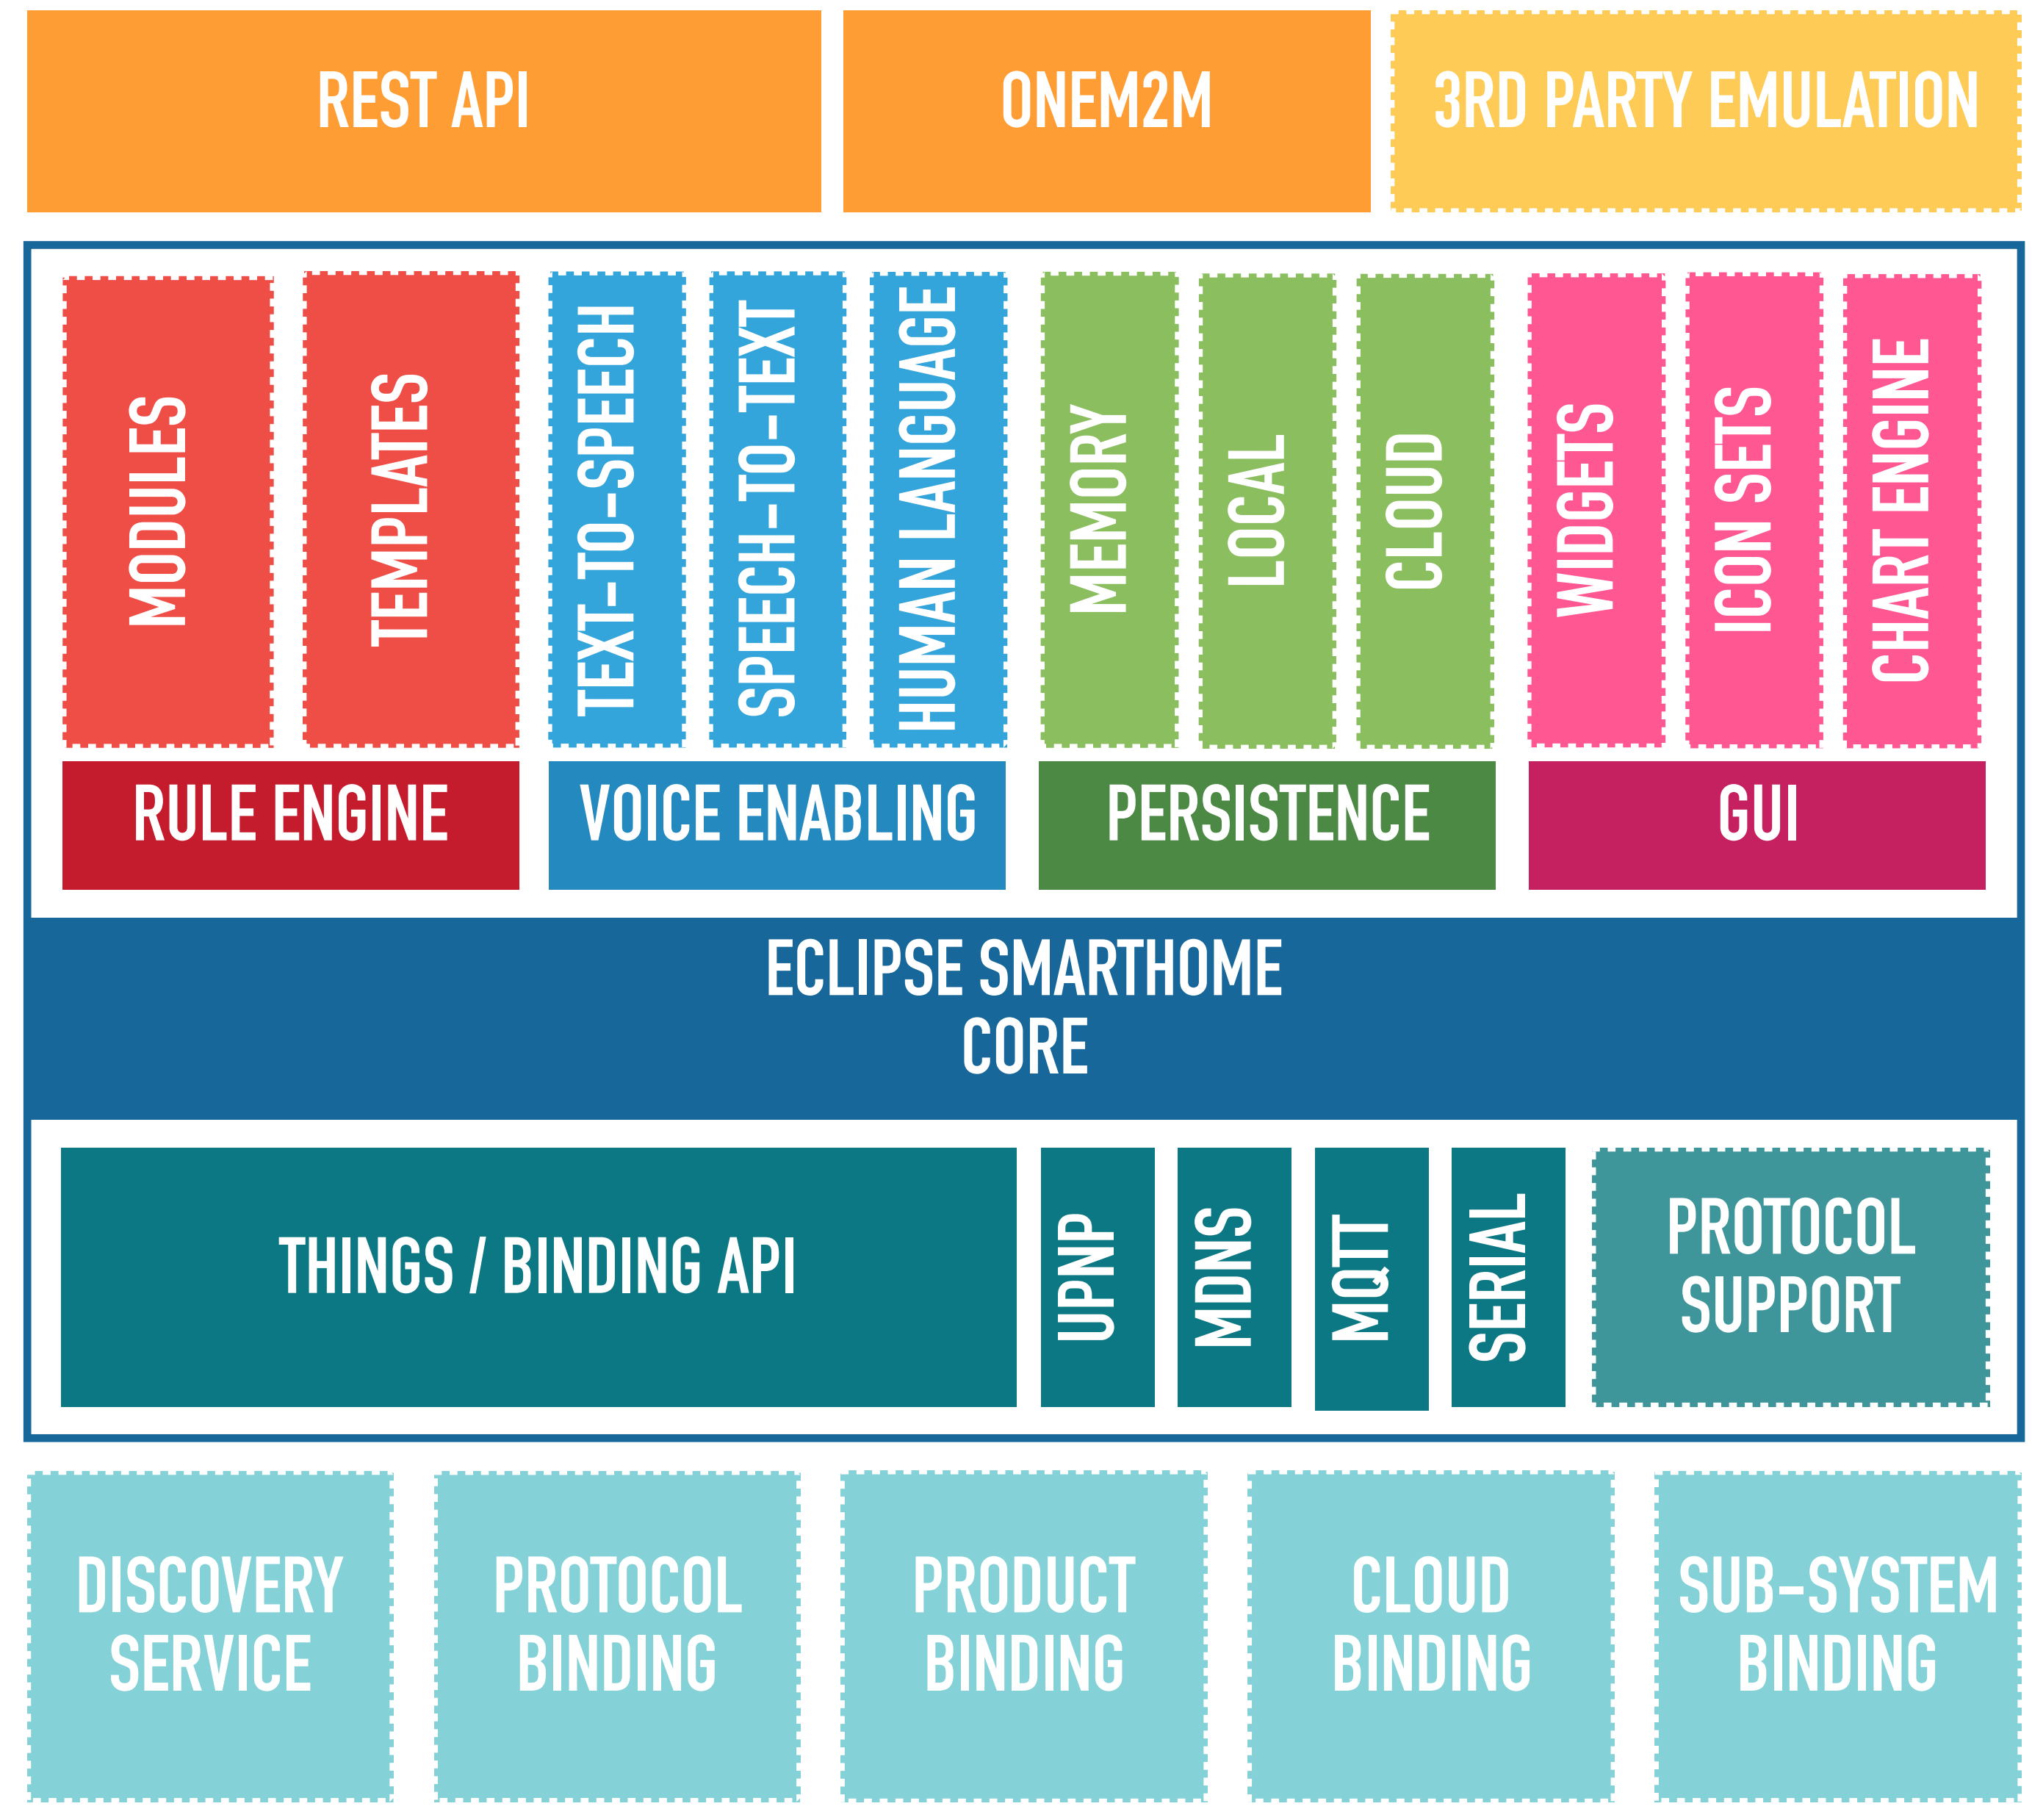

First rollout in QIVICON, incl. Hue binding

# CHALLENGES DURING INTEGRATION

- ▶ Simplify binding development
- ▶ Add APIs for device integration/configuration (Thing/Channel concept)
- ▶ Configuration UI missing
- ▶ APIs instead of DSLs, avoid xText in runtime
- ▶ Target for smaller embedded gateways (RaspPi1 class)
- ▶ Running with Security Manager

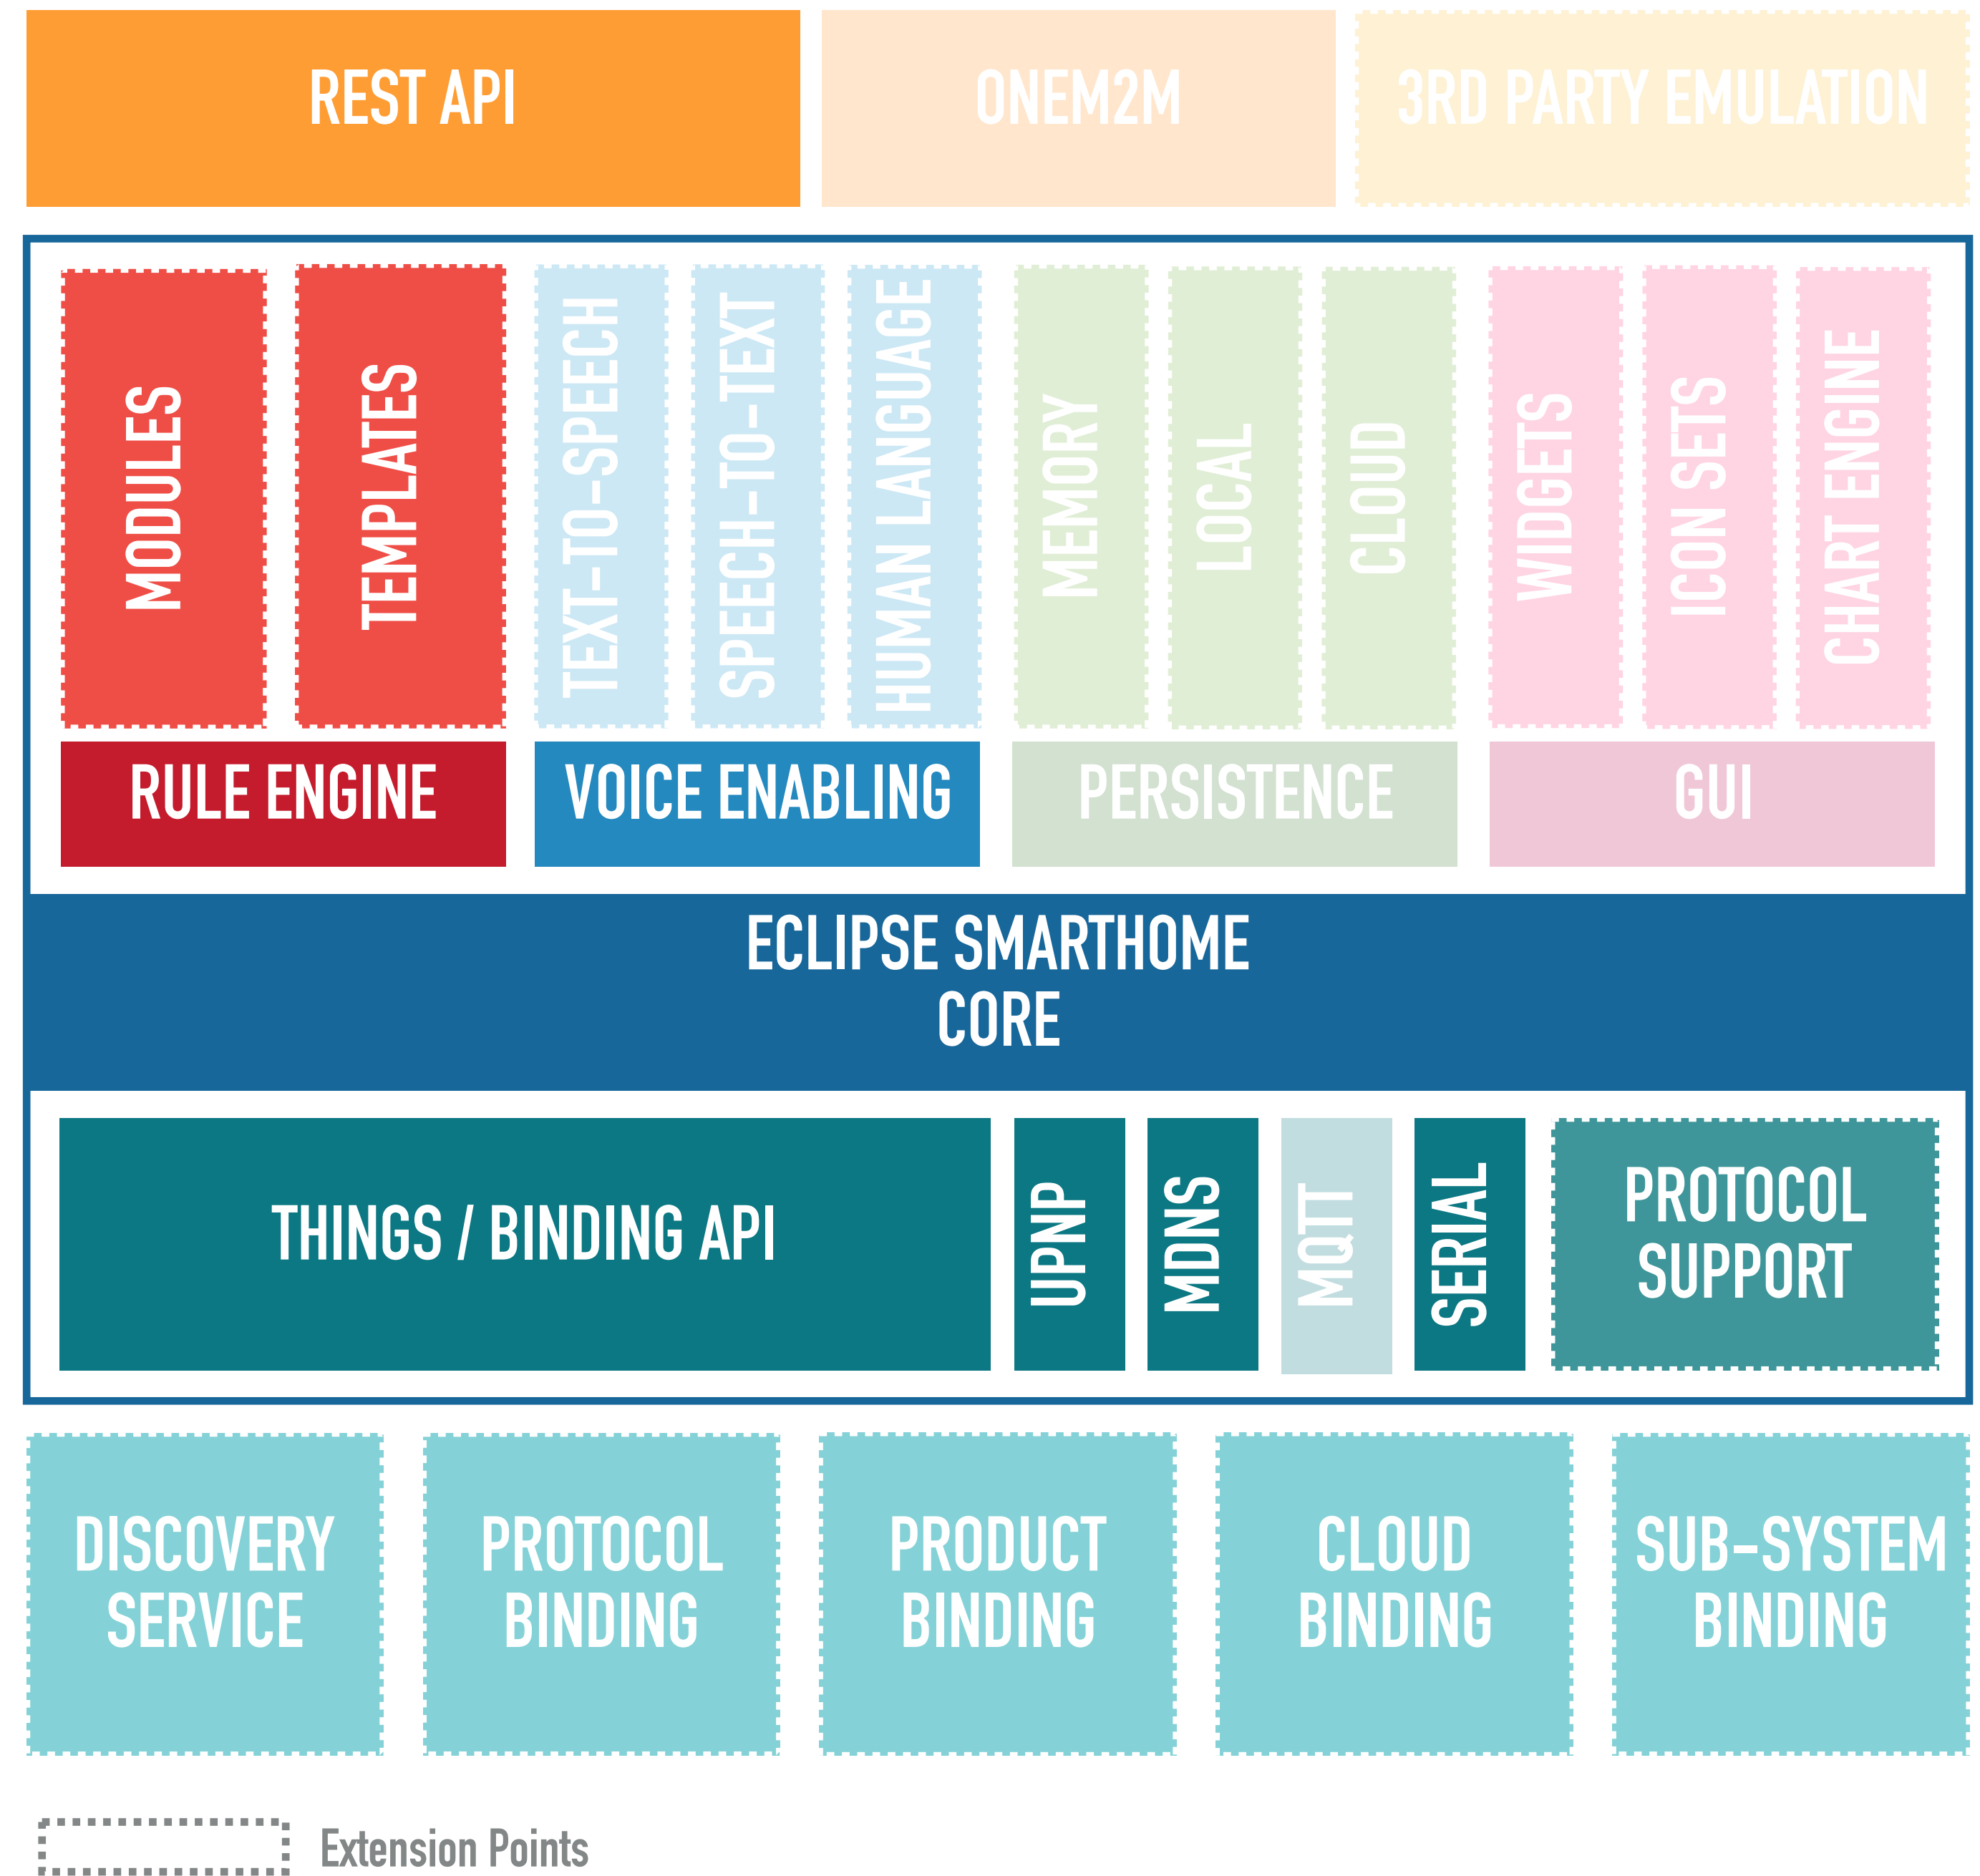

# ARCHITECTURE

 Extension Points

# ARCHITECTURE

 Extension Points

# EXTENDING HOME GATEWAYS – WE STARTED WITH

- ▶ Home Base v1
- ▶ Single-core ARMv6
- ▶ 512 MB Ram, 2 GB Flash
- ▶ HomeMatic builtin
- ▶ ZigBee HA 1.2 via USB stick

# EXTENDING HOME GATEWAYS – UPDATED VERSION IN 2016

- ▶ Home Base v2
- ▶ Dual-core ARMv7
- ▶ 512 MB Ram, 512 MB Flash
- ▶ WiFi, Bluetooth builtin
- ▶ DECT ULE, HomeMatic, Homematic IP, ZigBee builtin

# EXTENDING HOME GATEWAYS – FIRST ROUTER INTEGRATION

- ▶ Speedport Smart
- ▶ Dual-core ARMv7
- ▶ 512 MB Ram, 512 MB Flash
- ▶ Resources split between Router/QIVICON (50%)
- ▶ WiFi, Bluetooth, DECT builtin
- ▶ Homematic IP, ZigBee (stick)

# ARCHITECTURE ECLIPSE SMARTHOME AND QIVICON

powered by 

Partner applications

Eclipse SmartHome / QIVICON APIs

OSGi Framework: OSGi R4.2

JVM: JavaSE Embedded 7

OS: Linux

# JAVA UPDATES

Partner applications

Eclipse SmartHome / QIVICON APIs

OSGi Framework: OSGi R4.2

JVM: JavaSE Embedded 7

OS: Linux

- ▶ CVM until 2013 🙄
- ▶ JavaSE Emb. 7u21, 45, 71
- ▶ JavaSE Emb. 8 (01/2018)
  - ▶ Versions 8u60, 73, 131
  - ▶ Compact profiles 2, 3
  - ▶ Extensions (Nashorn, ...)
  - ▶ glibc, ucLibc
- ▶ Java for MIPS planned

# OSGI UPDATES – NOT YET

Partner applications

Eclipse SmartHome / QIVICON APIs

OSGi Framework: OSGi R4.2

JVM: JavaSE Embedded 7

OS: Linux

- ▶ OSGi R4.2 commercial framework, incl. compendium bundles
- ▶ DS compile time annotations introduced
- ▶ OSGi  $\geq$ R5 needs bigger migration of customer installations

# MAJOR CONTRIBUTIONS FROM COMMERCIAL PRODUCT

- ▶ Things concept, Firmware Update, Config Descriptions, Paper UI
- ▶ Core Eventing
- ▶ Optimizations: Jersey REST, Compact 2 profile
- ▶ Enhance I18N capabilities (multiple languages)
- ▶ Bindings: Philips Hue, Weather, Sonos
- ▶ Joint work on : jUPnP, jmDNS, OSGi-JAX-RS-Connector

# INTEGRATION FROM ECLIPSE SMARTHOME INTO PRODUCT

- ▶ PRs are done mostly direct on OpenSource
- ▶ Complex functions are discussed OpenSource and prototyped internally
- ▶ ESH Master goes into QIVICON Master all 2 weeks
- ▶ No fork of ESH, intermediate changes/compatibility due to API breaking changes
- ▶ Additional testing, especially lifecycle (update)

# COMMERCIAL EXTENSIONS OF ECLIPSE SMARTHOME (EXCERPT)

- ▶ Easy configuration, discovery/pairing, config UIs
- ▶ Secure Remote Access
- ▶ Camera support with secure streaming: local, via cloud
- ▶ Cloud storage integration for camera streams
- ▶ Sound API for speakers
- ▶ Run with Security Manager in restricted sandbox
- ▶ Push Notifications to SmartPhone apps

# THE TEAMS AND CONTRIBUTORS

## OpenSource Team

- ▶ Community
- ▶ Reviews, PRs
- ▶ Core Framework extensions

## Runtime Team

- ▶ OSGi framework, DS, Lifecycle, Libraries
- ▶ REST, jUPnP, jmDNS
- ▶ Tools, CI/CD

## API Team

- ▶ Things
- ▶ Configuration
- ▶ Firmware Update
- ▶ HomeMatic, ZigBee

## Binding Team

- ▶ OpenSource bindings
- ▶ Commercial bindings

# THE TEAMS AND CONTRIBUTORS (INTERNAL, EXTERNAL PARTNERS)
